

Children Health Breakthrough

May 2017

April 2015 my son had surgery getting his adenoids and tonsils removed. He also got tubes placed in his ears during this procedure. The tubes were supposed to drain the fluid that was built up in his ears and fall out within a year's time. Two years later, April 2017, I take my son back to the surgeon who put the tubes in his ears for a follow-up visit to make sure the tubes had fallen out and nothing else was wrong. The doctor said, "his left ear tube had not functioned properly;" fluid was still built up. But he said, "your son had lost some of his hearing, and he would need to see me the following week to check if the fluid drained or he'd need to have the surgery done again in 2 weeks." The time frame was a crunch, but I believe in divine healing and rapid recovery since being a part of the Winner's family. As a parent, I was distraught because no parent wants their children to have certain challenges, but I got myself together, and I told my Winner's prayer family. Because I had been praying kingdom advancement prayers that Bishop David Oyedepo wrote consistently, I had to believe that, "My Case Was Different." I went home prophesied to his ear, put oil on it and sealed it with a belief that my son would not need surgery and that his hearing was fully restored as instructed per Hazelle and my Winner's family. I did this until it was time to take my son back to the doctor for his follow up visit and lo and behold the doctor said: "You are one lucky mama, your son does not need surgery and his hearing is back." My response was "His Case was Different."
